## Professional Summary

As an experienced software developer with a passion for creating efficient, user-friendly web applications, I have worked on a range of exciting projects across different industries. With a strong background in PHP and a proficiency in various other programming languages and frameworks such as SAP ABAP, UI5, BRF, Laravel and ReactJS, I have contributed to the successful development of multiple software systems, including the Taxpayer Online Services portal for the Fiji Revenue and Customs Service, the Customer Relationship Management System for Supercharged Fiji, and the Dpay web application for Tri-e Multimedia.

## Areas of Expertise

PHP, Laravel, Lumen	SAP, ABAP, UI5, Fiori	BRF+, Web Dynpro
ReactJS	MySQL	JavaScript, jQuery
CSS, SASS, Bootstrap	C#, Java, Android Studio	

## Work History

### Software Developer

Jun 2022 – Apr 2024

#### Fiji Revenue and Customs Service – Suva, Fiji

- Developed enhancements and new features for the Taxpayer Online Services (TPOS) portal using SAP ABAP, UI5, BRF+, Web Dynpro, and Fiori.
- Designed and implemented responsive, user-friendly interfaces for the TPOS portal with the SAPUI5 framework.
- Translated business requirements into technical specifications.
- Integrated UI5 frontend applications with backend systems via OData services.
- Analyzed, debugged, and resolved system issues reported via AMS tickets, ensuring portal stability.
- Conducted and documented comprehensive unit tests for all code modifications.

## Senior Backend Developer

Aug 2019 – May 2022

### Supercharged Fiji – Suva, Fiji

- Led development of a Laravel-based CRM to manage customer data, track sales leads, and generate invoices.
- Built a comprehensive HR intranet application with Laravel for timesheet management, wage calculation, payslip generation, and KPI reporting.
- Engineered a real-time appointment booking application in Laravel, supporting 60-100+ concurrent call-centre agents.
- Developed APIs using the Lumen framework and integrated third-party services via SOAP and RESTful APIs.
- Constructed a Universal Login System using OAuth 2.0 for single sign-on across company applications.
- Configured and managed CentOS VPS servers for hosting internal and external web applications.

## PHP Developer

Oct 2018 – Apr 2019

### Tri-e Multimedia – Puchong, Selangor, Malaysia

- Developed the Gift Code Redemption (GCR) web application from the ground up using Laravel for a major HSBC Bank promotional campaign.
- Collaborated on the creation of Dpay, a web application for sales and payment processing for retail partners.
- Authored complex MySQL Stored Procedures to generate various data summary reports for the Dpay system.
- Contributed to the development of an order management backend system to streamline e-commerce operations.

## Education

---

### Advanced Diploma of Information Technology

#### Collins International College, Melbourne, Australia

April 2024 – Present

### Bachelor of Commerce in Accounting and Information Systems

#### University of the South Pacific, Suva, Fiji

February 2013 – August 2016

- Awarded Gold Medal for the most outstanding graduate with a major in Information Systems (GPA: 4.04/4.5).
